Some Tennessee Riflemen.

A yarn is told in Manila, and it concerns the prison and two Tennessee volunteers. A Filipino convict had climbed the prison wall and was running for dear life through the open. Two long-legged Tennesseans were on guard duty. They knelt to fire. "I don't guess it's more'n three hundred yards," said one quietly.

"I reckon it's most five hundred," said the other, as if he were discussing the weather.

The prisoner was running like a deer and rapidly approaching the undergrowth around innumerable little huts where he would be safe.

"Call it four hundred," said the first Tennessean in a conciliatory tone.

They adjusted their sights, aimed and fired. The escaping convict fell, and the two Tennesseans went out to bring in what was left of him.

"If he's hit in the head, it's my shot," said one.

"I aimed low, accordin' to a'my regulations," drawled the other.

The convict was found with one bullet through the back of his head and another through the lower end of the spine. They know how to shoot in the mountains of Tennessee.—*Harper's Weekly*.
